Human Activity Recognition Using Multi-input CNN Model with FFT Spectrograms
Kei Yaguchi, Kazukiko Ikarigawa, Ryo Kawasaki, Wataru Miyazaki, Yuki Morikawa, Chihiro Ito, Masaki Shuzo, Eisaku Maeda
Tokyo Denki University

Method

Preprocessing

Retention Position Estimation

State Estimation

Validation

Results for test data

It was estimated that 99% of the data was measured from Hips

State Estimation

Fine-tuning
